EDUCATION

University of Connecticut (UCONN) **Storrs, USA**
PhD in *Computer Science and Engineering* Supervisor: Prof. Fei Miao ***Aug. 2018-May 2023(expected)***

- GPA: **4.0/4.0**
- Core courses: *Algorithms, Formal Methods, Machine Learning, Advanced Computer Network, Optimal & Model Predictive Control, Deep Reinforcement Learning, Cryptography*

Shanghai Jiao Tong University (SJTU) **Shanghai, China**
(*University of Michigan-SJTU Joint Institute*) ***Sep. 2015-Mar. 2018***
M.S. in *Electrical and Computer Engineering* Supervisor: Prof. Chengbin Ma

- GPA: **3.96/4.0 Ranking: 1/20**
- Core courses: *Game Theory, Data Mining, Engineering Optimization, Methods of Applied Mathematics I, Probability and Random Process, Mechatronic Systems Design, New Energy System*

Nanjing University (NJU) **Nanjing, China**
B.Eng. in *Automation* ***Sep. 2011-Jun. 2015***

- GPA: **4.44/5.0 Ranking: 1/34**
- Core courses: *Principles of Automatic Control, Modern Cybernetics, Operations Research, C++, Data Structure, Database, Computer Vision, Computer Network, Signals and Systems, Digital Signal Processing, Circuit Analysis, Analog Circuit, Digital Circuit, Principles of Microcomputer*

RESEARCH EXPERIENCE

University of Connecticut
Research Assistant, supervised by Prof. Fei Miao ***Aug. 2018-Present***

- **Key words:** multi-agent reinforcement learning (MARL), safe MARL, robust MARL, game theory
- Designed an algorithm to exploit the advantages raised by the extended sensing capability of connected autonomous vehicles (CAVs) through beneficial information sharing.
- Analyzed quantum key distribution protocols through a game theoretic framework to show improved noise tolerance and secure communication rate assuming adversaries are "rational".
- Designed an integrated information sharing and multi-agent reinforcement learning framework for the behavior planning of connected autonomous vehicles to improve traffic efficiency and safety.
- Studied the fundamental properties of the robust multi-agent RL problem under adversarial state perturbations. We define the concept of a robust agent policy and prove its existence.
- Designed a stable and efficient reward reallocation algorithm to motivate cooperation for multi-agent reinforcement learning assuming all agents are self-interested.

Reinforcement Learning for Autonomous Driving
Research Internship, Baidu USA Apollo team ***May 2020-Dec. 2020***

- Summarized existing reinforcement learning methods and the state-of-art deep learning methods used in autonomous driving.
- Wrote a design document for single and multi-agent RL, distributed learning, algorithm architecture and interface, and a prototype design.
- Built a prototype platform to train and test RL algorithms for autonomous vehicles in the Apollo platform and Amazon Web Services (AWS).

Energy Management of Battery/Super Capacitor Hybrid System

Team Leader, collaborating with Nippon Chemi-Con Corporation, Japan ***Dec. 2016-Apr. 2017***

- Improved the energy management approach of a hybrid energy storage system in a novel topology.
- Improved the system efficiency without the help from special alternator like MAZDA i-ELoop.

Dynamic Systems Control Laboratory, UM-SJTU Joint Institute

Research Assistant, supervised by Prof. Chengbin Ma ***Sep. 2015-Mar. 2018***

- **Key words:** game theory, optimization, microgrid, energy management, electric vehicle
- Designed a flexible energy management approach to handle the uncertainties of weather and sizing in an isolated microgrid, which would not be influenced dramatically by different weather conditions.
- Designed and fabricated high efficient bidirectional DC/DC converters to conduct and validate energy management approaches in a downsized system.
- Built a hardware testbed to study reconfigurable energy systems.

3D Laser Processing Based on Computer Vision ***May 2013-Dec. 2014***

Team Leader, sponsored by National Undergraduate Training Programs for Innovation and Entrepreneurship

- Combined a camera and structured light to model a feather in 3D, which rebuilt the feather's shape.
- Successfully extracted the feather stroke with image processing methods, including Hough transform.

SKILLS

Standardized Tests: TOEFL iBT: 107, GRE: V152 + Q170 + AW3.5
Programming: Python, C/C++, MATLAB, LabVIEW, SQL
Tools: Deep reinforcement learning, LaTeX, Linux, Git, CARLA, NI myRIO, NI CompactRIO, Arduino, PIC, Altium Designer, Multisim, AutoCAD

HONOR & AWARDS

- Best Paper Award, in the DCAA workshop at the 37th AAAI Conference ***Feb.2023***
- GE Fellowship of Excellence, University of Connecticut ***Aug. 2022***
- Predoctoral Research Fellowship, University of Connecticut ***May 2022***
- First Place Award, 8th Annual Graduate Poster Competition, University of Connecticut ***Mar. 2022***
- Predoctoral Research Fellowship, University of Connecticut ***May 2021***
- Best Paper Award, 12th ACM/IEEE International Conference on Cyber-Physical Systems ***May 2021***
- Cigna Graduate Fellowship, University of Connecticut ***Aug. 2020***
- Predoctoral Research Fellowship, University of Connecticut ***May 2020***

- Postgraduate Academic Excellence Scholarship, Shanghai Jiao Tong University ***Oct. 2016***
- Guanghua Scholarship, Shanghai Jiao Tong University ***Dec. 2015***
- Outstanding Graduates of Nanjing University ***May 2015***
- National Endeavor Fellowship, 3 times, Nanjing University ***Dec. 2012-Dec. 2014***
- Outstanding Winner of Educational Robot Competition in China, Chinese Association for Artificial Intelligence ***Nov. 2014***
- Meritorious Winner of 2014 MCM, the Consortium for Mathematics and Its Applications ***May 2014***
- Outstanding Students of Nanjing University, 2 times, Nanjing University ***Nov. 2012-Nov. 2013***

SERVICE EXPERIENCE

Reviewer,

- IEEE Transactions on Industrial Informatics
- IEEE Transactions on Neural Networks and Learning Systems
- The 43rd Annual Conference of the IEEE Industrial Electronics Society (IECON 2017)
- The 58th Conference on Decision and Control (CDC 2019)
- The 2020 American Control Conference (ACC 2020)
- The 59th Conference on Decision and Control (CDC 2020)
- The 2021 American Control Conference (ACC 2021)
- 2020 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS 2020)
- 2021 IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS 2021)
- 2022 IEEE International Conference on Robotics and Automation (ICRA 2022)
- 2023 IEEE International Conference on Robotics and Automation (ICRA 2023)

Invited Talk,

- Department of Computer Science, University of Maryland, College Park. ***Feb. 2023***
