

# SONGYANG HAN

University of Connecticut, Storrs, CT, USA | +1(860)931-8762  
Email: [songyang.han@uconn.edu](mailto:songyang.han@uconn.edu) | Website: [www.songyanghan.com](http://www.songyanghan.com)  
Linkedin: <https://www.linkedin.com/in/songyanghan/> | [Google Scholar](#)

## EDUCATION

---

**University of Connecticut (UConn)** **Storrs, USA**  
PhD in *Computer Science and Engineering* Supervisor: Prof. [Fei Miao](#) *Aug. 2018-May 2023(expected)*

- GPA: **4.0/4.0**
- Core courses: *Algorithms, Formal Methods, Machine Learning, Advanced Computer Network, Optimal & Model Predictive Control, Deep Reinforcement Learning, Cryptography*

**Shanghai Jiao Tong University (SJTU)** **Shanghai, China**  
([University of Michigan-SJTU Joint Institute](#)) *Sep. 2015-Mar. 2018*  
M.S. in *Electrical and Computer Engineering* Supervisor: Prof. [Chengbin Ma](#)

- GPA: **3.96/4.0** **Ranking: 1/20**
- Core courses: *Game Theory, Data Mining, Engineering Optimization, Methods of Applied Mathematics I, Probability and Random Process, Mechatronic Systems Design, New Energy System*

**Nanjing University (NJU)** **Nanjing, China**  
B.Eng. in *Automation* *Sep. 2011-Jun. 2015*

- GPA: **4.44/5.0** **Ranking: 1/34**
- Core courses: *Principles of Automatic Control, Modern Cybernetics, Operations Research, C++, Data Structure, Database, Computer Vision, Computer Network, Signals and Systems, Digital Signal Processing, Circuit Analysis, Analog Circuit, Digital Circuit, Principles of Microcomputer*

## RESEARCH EXPERIENCE

---

**University of Connecticut**  
**Research Assistant**, supervised by Prof. Fei Miao *Aug. 2018-Present*

- **Key words:** multi-agent reinforcement learning (MARL), safe MARL, robust MARL, game theory
- Designed an algorithm to exploit the advantages raised by the extended sensing capability of connected autonomous vehicles (CAVs) through beneficial information sharing.
- Analyzed quantum key distribution protocols through a game theoretic framework to show improved noise tolerance and secure communication rate assuming adversaries are “rational”.
- Designed an integrated information sharing and multi-agent reinforcement learning framework for the behavior planning of connected autonomous vehicles to improve traffic efficiency and safety.
- Studied the fundamental properties of the robust multi-agent RL problem under adversarial state perturbations. We define the concept of a robust agent policy and prove its existence.
- Designed a stable and efficient reward reallocation algorithm to motivate cooperation for multi-agent reinforcement learning assuming all agents are self-interested.

### Reinforcement Learning for Autonomous Driving

**Research Internship**, Baidu USA Apollo team *May 2020-Dec. 2020*

- Summarized existing reinforcement learning methods and the state-of-art deep learning methods used in autonomous driving.
- Wrote a design document for single and multi-agent RL, distributed learning, algorithm architecture and interface, and a prototype design.
- Built a prototype platform to train and test RL algorithms for autonomous vehicles in the Apollo platform and Amazon Web Services (AWS).

## Energy Management of Battery/Super Capacitor Hybrid System

**Team Leader**, collaborating with [Nippon Chemi-Con Corporation](#), Japan

**Dec. 2016-Apr. 2017**

- Improved the energy management approach of a hybrid energy storage system in a novel topology.
- Improved the system efficiency without the help from special alternator like MAZDA i-ELoop.

## Dynamic Systems Control Laboratory, UM-SJTU Joint Institute

**Research Assistant**, supervised by Prof. Chengbin Ma

**Sep. 2015-Mar. 2018**

- **Key words:** game theory, optimization, microgrid, energy management, electric vehicle
- Designed a flexible energy management approach to handle the uncertainties of weather and sizing in an isolated microgrid, which would not be influenced dramatically by different weather conditions.
- Designed and fabricated high efficient bidirectional DC/DC converters to conduct and validate energy management approaches in a downsized system.
- Built a hardware testbed to study reconfigurable energy systems.

## 3D Laser Processing Based on Computer Vision

**May 2013-Dec. 2014**

**Team Leader**, sponsored by National Undergraduate Training Programs for Innovation and Entrepreneurship

- Combined a camera and structured light to model a feather in 3D, which rebuilt the feather's shape.
- Successfully extracted the feather stroke with image processing methods, including Hough transform.

## SKILLS

**Standardized Tests:** TOEFL iBT: 107, GRE: V152 + Q170 + AW3.5

**Programming:** Python, C/C++, MATLAB, LabVIEW, SQL

**Tools:** Deep reinforcement learning, LaTeX, Linux, Git, CARLA, NI myRIO, NI CompactRIO, Arduino, PIC, Altium Designer, Multisim, AutoCAD

## HONOR & AWARDS

- |  |                  |
|--|------------------|
| • Runner-up Award, in the DCAA workshop at the 37 <sup>th</sup> AAAI Conference                    | <b>Feb. 2023</b> |
| • GE Fellowship of Excellence, University of Connecticut   | <b>Aug. 2022</b> |
| • Predoctoral Research Fellowship, University of Connecticut                                       | <b>May 2022</b>  |
| • First Place Award, 8 <sup>th</sup> Annual Graduate Poster Competition, University of Connecticut | <b>Mar. 2022</b> |
| • Predoctoral Research Fellowship, University of Connecticut                                       | <b>May 2021</b>  |
| • Best Paper Award, 12 <sup>th</sup> ACM/IEEE International Conference on Cyber-Physical Systems   | <b>May 2021</b>  |
| • Cigna Graduate Fellowship, University of Connecticut   | <b>Aug. 2020</b> |
| • Predoctoral Research Fellowship, University of Connecticut                                       | <b>May 2020</b>  |

- Postgraduate Academic Excellence Scholarship, Shanghai Jiao Tong University *Oct. 2016*
- Guanghua Scholarship, Shanghai Jiao Tong University *Dec. 2015*
- Outstanding Graduates of Nanjing University *May 2015*
- National Endeavor Fellowship, 3 times, Nanjing University *Dec. 2012-Dec. 2014*
- Outstanding Winner of Educational Robot Competition in China, Chinese Association for Artificial Intelligence *Nov. 2014*
- Meritorious Winner of 2014 MCM, the Consortium for Mathematics and Its Applications *May 2014*
- Outstanding Students of Nanjing University, 2 times, Nanjing University *Nov. 2012-Nov. 2013*
